

# Take control Succeed with your projects

## Make your projects successful

Projectplace is a web-based collaborative application for easy and efficient project management with innovative solutions for team communication. Projectplace helps you avoid excessive e-mailing back and forth, project information scattered in several places, multiple document versions, meeting coordination troubles, and vaguely defined areas of responsibility. When communication and cooperation are organised through Projectplace you simply get more time left over for other things.

## Anywhere, anytime

Project management is very time consuming. A great deal of effort is required to keep everyone up-to-date and to ensure that team collaboration runs smoothly. Projectplace makes team communication easy – whether you're all in the same room, on different continents or in different companies. Using the Internet, team members can log into the project at any time to find out about the latest developments, access and update information, and follow project progress.

## Quick and easy

You can get started with Projectplace directly via the web, or try it out for free with full functionality before you decide. You can also request a personalized online demo to help you get up and running as quickly as possible.

## Effective web meetings

At Projectplace you can hold meetings on the web using Netviewer, Europe's leading web meeting tool. As many as ten people can be in different locations around the world and share the same document, presentation or any other application that is being shown on your screen. Online meetings mean less travelling and shorter meetings, saving both time and money.

## One project or many

Projectplace is as user-friendly and effective for one single project as it is with all your projects. Choose the subscription that suits you best:

- **Personal Edition**  
Personal document management, SMS and Projectplace Planner, our new, fast and visual planning tool. Use the Beta version free!
- **Team Edition**  
When effective communication with and within the team is crucial – whether it involves online meetings, SMS or via documents.
- **Enterprise Edition**  
Enterprise Edition are an all-in-one solution for the project-driven organisation which allows for unlimited use at a flat rate. Add-on features such as project reporting and project portfolio management (PPM) can be included.

## Secure, reliable, and always available

It is important for our customers that information stored at Projectplace is always available and at least as secure as on your own network. To ensure that only authorised project members can access the information, we follow a strict security policy. Read more about our rigorous security work at [www.projectplace.com](http://www.projectplace.com).

## About us

Projectplace International has been developing and delivering on-demand project applications since 1998. Today, Projectplace is available in seven languages and is the market leader in Europe. We have more than 100 employees with our head office in Stockholm and local offices in Denmark, Norway, Germany and the Netherlands.
