# Project Collaboration with Projectplace
– a complete solution for Teams, Project Managers, and Stakeholders

It's getting tougher to manage projects in today's world. Teams are increasingly dispersed; collaborating on tasks and keeping track of who is working on what is a challenge; tracking progress takes time. Are you looking to increase transparency of your work and bring your team together to collaborate and get things done? Have a look at what Projectplace can do for you.

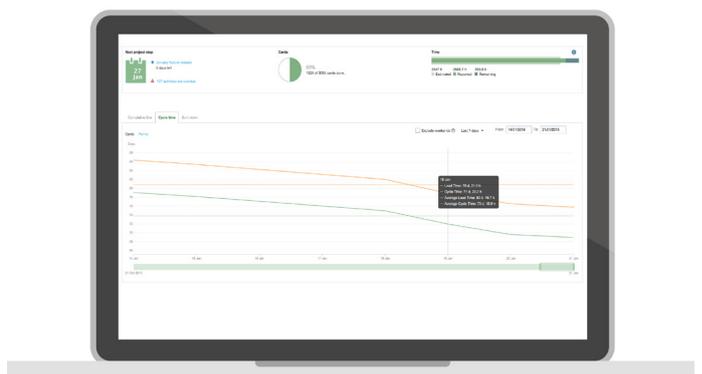

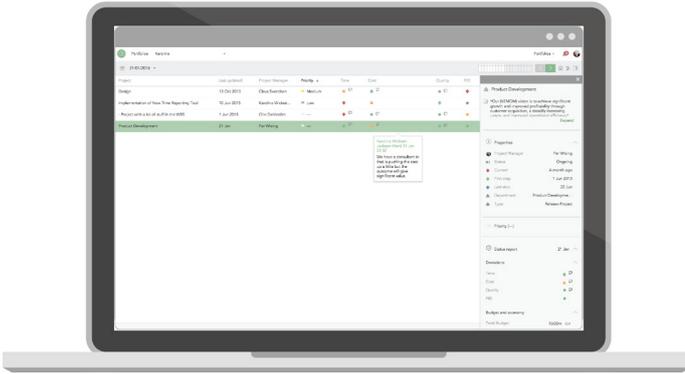

For the team. Whether your team is down the hall or on the other side of the globe, give them everything they need to get work done.

- Kanban boards help visualize commitments, so that everyone knows who is working on what

- Document management allows easy access to project-related files and ends the unmanageable 'Reply all' e-mail chains and document versions

- Real-time communication enables team members to instantly share feedback and ideas

- Stay up to date and get work done from anywhere on any device with Project mobile apps

For the project manager. Whether you are a traditional or 'accidental' project manager, you need to bring your team(s) together to get work done.

- Classic Gantt view helps visualize goals and the plan to get there, and allows the team to break down their work into actionable items on Kanban boards

- Workload management provides visibility into project members' commitments and time spent on different tasks. Quickly identify bottlenecks and see who might be available for additional work

- Powerful dashboards enable real-time progress tracking and help project managers understand where their attention is needed

For the stakeholders. Provide stakeholders with a real-time overview of how your project(s) are performing.

- Increase transparency of information between project managers and stakeholders across project portfolios

- Visualize project health and key KPIs, enabling stakeholders to identify and address projects that need attention

- Projectplace content pack for Microsoft Power BI provides more advanced visuals and dashboard capabilities for tracking work across projects and teams

5 reasons teams chose Projectplace for project collaboration:

1. Designed from day 1 to bring virtual teams together to get work done

2. Connects planning with execution to provide a complete insight, control and visibility over project goals, tasks and timelines

3. User-friendly. Can be set up in minutes. Mobile optimized

4. Helps manage teams, work, and projects – for professional or 'accidental' project managers

5. Safe and secure

Projectplace, a part of Planview, is a smart project collaboration solution that brings teams together to improve collaboration and get things done. Whether your team is down the hall or on the other side of the globe, Projectplace provides everything teams need to set direction, communicate, execute tasks, track progress, and ultimately achieve goals, no matter where they work.

Time to empower you and your team to get things done?
