

## Solution brief

# What's New in Projectplace October 2016

With the October Release of Projectplace, we are pleased to introduce the next generation of collaborative work management for getting things done.

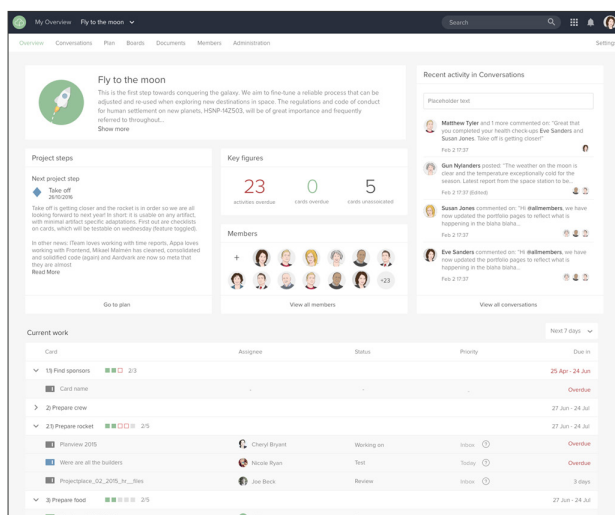

Highlights of this release include:

- Streamlined User Experience
- Re-imagined 'My Overview'
- Collaborative Workstreams

## Projectplace: The Next Generation

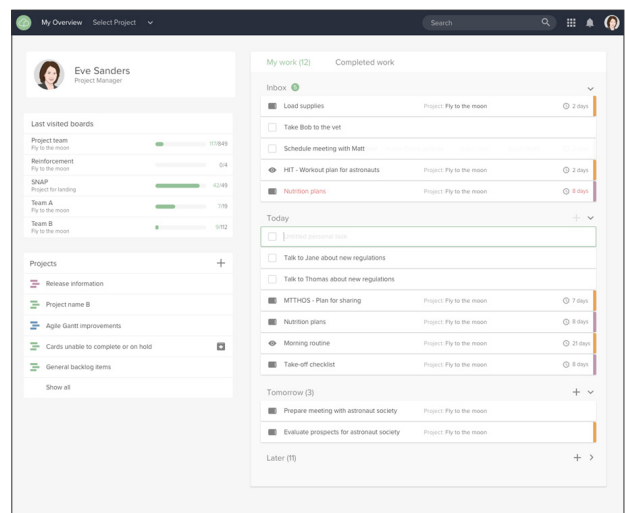

### Streamlined User Experience

Whether you're an Administrator, Project Manager, or Team Member, you'll be able to enjoy all of the benefits that come with our new Projectplace user experience. You will find that the product is more appealing and intuitive than ever. Designed in Sweden, this new user experience showcases a modern, flat design while accentuating the collaborative functionality that makes working with the product so enjoyable.

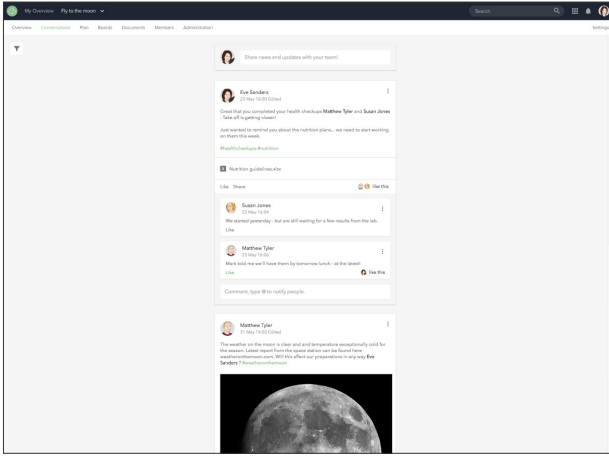

### My Overview

Introducing a new way of managing your day to day tasks. Whether you have a report to finish at work or you need to pick up milk from the store; the reimagined 'My Overview' will allow you to prioritize and execute on any task that comes your way.

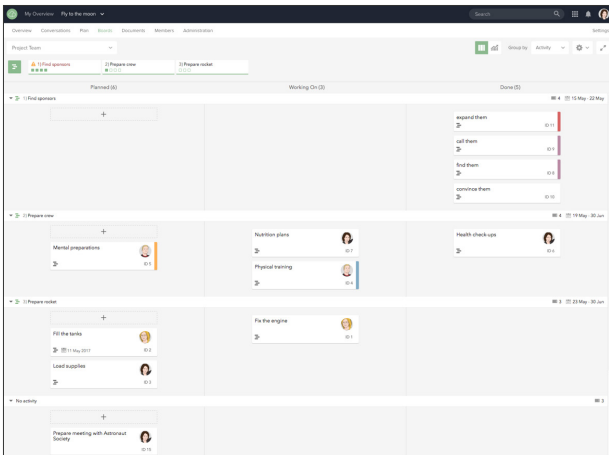

### Conversations

Following the theme of simplifying and consolidating our user experience, we are releasing a redesigned Conversations tool. We are introducing Recent Conversations in the Project Overview that will provide you with the most recent and relevant posts, helping to reduce clutter. The full contents of your workspace discussions are available in the Conversations tab. We have also added the ability to edit Conversation posts, helping to provide you with a more complete social collaboration experience.

## Collaborative Workstreams

Projectplace now provides a more streamlined interaction between activities, boards and cards. Users have the ability to directly connect activities to boards. This provides a single consolidated view of all tasks necessary to complete an activity on the plan and allows project managers and teams to collaborate and break down work in a single view. Collaborative Workstreams will also allow users to “unclutter” boards containing long lists of completed cards.
